

Student Fee Allocation Committee Meeting

Wednesday April 26, 2023

(Ended at 10:30am) Beginning with Athletics: Jess

- BDAC and Student athletic fee
- For BDAC its currently \$25 per student that is used to pay the front desk worker (position costs \$4600 as a minimum)
 - If he reduces the cost of the employee he would be able to use the money to help upgrade the building and equipment
 - Asking for it to be raised by \$10 (so \$35 BDAC fee) that way the employee can stay the same \$/hour but then can use extra funds to upgrade the facilities.
- Student athletic fee \$10 raise from \$30 to a \$40 fee
 - We are getting a new monitor display for the BDAC gym but we need to pay the people who are working. (stats, concessions, etc)
 - This would allow for us to not have to constantly find new sponsors.
 - Wanting to propose new sports and take things to the next level so we need the student fees in place to support those new ideas.
- (get the handout from Eric or Cameron from Jess)

Next: JJ and Susan (began at 10:31)

- Asking for \$9100 (brought up the idea of having a class fee for the students to pay for when they register for the class like ceramics or piano)
 - Views online are **skyrocketing**. We can focus on that.
 - Basic cost for the newspaper is not negotiable
 - Wanting to bring radio to campus and few other things
 - They've tried advertising but alas apparently it didn't work
 - Jess made some great points about how susan can ask for more money from Logan just like he has for Kinesiology
 - Smallest amount they can print is 800 copies of the newspaper.
 - If they combine with the statesman its \$800 a week

Amy Peters (began 10:57)

- IT and Library fees (wants the same budget)
 - Subject databases, journals, streaming videos etc.
 - For IT it's software, hardware, networking, repairs etc.
 - Jan Thornton: they do their own separate submission

Jan Thornton/ Kevin Hurst: (11:01)

- Counseling (CAPS) Student services health center
- CAPS wants to sustain and keep the same budget and so does Student Services Health Center
 - They want to be able to have those interns that can practice and help students who are struggling with their mental health
 - The student fees cover the medical clinics that students can go to twice during the semester.

One Stop/Kevin Hurst/Liz Prettyman (11:05)

- Wanting to sustain and keep the same budget
 - There are snacks that she has in the One Stop that allow for students to get "brain food" that way if there are food insecurities students have a good place to get food. That's why they have the fee that they do.
 - She wants to be able to keep providing the needs for students
 - Think of the hierarchy of needs chart from classes, food needs have to be met or learning cannot take place.
